EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 1-3, 19, 21, 22, 24, 26-30, and 34-41 have been canceled without prejudice as being drawn to a non-elected invention.

The following is an examiner's statement of reasons for allowance: The subject matter of the independent claims can either not be found or was not suggested in the prior art . The subject matter not found was the method for extracting and analyzing cardiac parameters including the steps of analyzing noise levels, determining a plurality of pulsometric parameters, and averaging the plurality of pulsometric parameters for a number of significant R-R intervals, in combination with the other steps in the claim. The closest prior art of Ambos teaches determining characteristic points where the signal reaches a max/min, determining a plurality of QRS complex parameters and significant R-R intervals, and averaging the plurality of QRS parameters, but not analyzing noise levels, determining a plurality of pulsometric parameters, and averaging the plurality of pulsometric parameters for a number of significant R-R intervals

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
